### “Is There Something More?”

Introduction:

Sometimes, you'll find yourself displeased, purposeless, depressed, unknowing, bored, lacking adventure, some other negative emotion, or all of the above. You'll wonder how you got to where you are, or if you are anywhere in your life, or why you got to where you are, or when you'll get where you're supposed to be. And maybe, you'll meet the dead-end question: What's the meaning of it all?

You can question all you want, but it's probably that you'll never find the answer. Because, perhaps, that's an incorrect question. Perhaps you can't ask any question to get the answer that you are seeking from that question (the answer you're searching for being your purpose, meaning, duty, and not the subjective kin that people settle for because they come to terms that tell you to reject an overall objective meaning). But also, perhaps, the best thing you can do in order to approach, at the very least, a correct answer is to stay curious as to what the answer might be to the meaning-of-life question, and all the while ask: is there something more?

*“Is there something more?”*

And upon asking the question, you enlist yourself to embark on a journey, an adventure, to cure your unpleasantness and boredom. Because as soon as you ask the question, your perspective changes.

You begin to look for something more in everything. You actively seek knowledge. You seek *truth*, in your life, your relationships, your career, yourself, your world. And, you can't stop, and you shouldn't stop, asking the question.

Asking if there is something more can be summed up in one trait: curiosity. Curiosity can be summed up in one action: thinking. The ability to think can be summed up in one word: a gift. The gift that sets us humans apart from every other clump of atoms that's the result of the universe.

We mustn't forget or fail to consider these principles. Truth, love, justice, science, people, these are all subject areas to where the essential question can, and should, be applied. The thrill that the curiosity will bring you will be able to suffice your misery, boredom, and seemingly insignificant, meaningless existence.

Chapter 1 | Truth:

*Truth*, the primordial word.

Chapter 2 | Love:

Chapter 3 | Justice:

Chapter 4 | Science:

Chapter 5 | People:
